

GROW2 KNOW

PETER RABBIT™
120
YEARS OF MISCHIEF

To celebrate **Peter Rabbit's 120th birthday**, we have teamed up with non-profit garden designers **Grow2Know** to bring you some fun and easy gardening activities!

Mr. McGregor's Pots

How to create a vertical garden with recycled pots and cans

You will need:

- A selection of clean tin cans and terracotta pots
- Cable ties or gardening wire
- A wire grid, trellis or a ladder to hang pots on
- Potting compost
- Selection of herbs or seedlings
- Vegetable seeds
- A trowel
- Scissors

Step by step

- Ensure your trellis or metal grid in place and firmly attached to a wall or fence
- For the pots, take a cable tie and loop it through the hole in the bottom and secure at the side
- Take a second cable tie and loop it through the first and then attach to your grid or trellis
- Trim any excess from the cable ties using the scissors
- Add a plant to the pot and fill the gaps with potting compost
- For the tin cans, wind the garden wire around the outside of the can and twist to fasten
- Add more herbs or fill with potting compost and plant some vegetable seeds
- Attach the tin cans to the metal grid or trellis using a cable tie or more garden wire
- Make sure you water your vertical garden on a regular basis!

NB: Please supervise children at all times during this activity.
